## About

Junior web developer proficient in JavaScript, MERN technology stack, and React engineering. Tackles challenges in both front and back-end development by applying new technologies practically and increases team efficiency as a valuable team member

## Experience

### Program Assistant, Transitions Clinic Network
San Francisco, CA – July 2018 - July 2020

- Developed program materials related to curricula, newsletters, reports, and contract deliverables.
- Assisted leadership team with scheduling, event planning, and grant writing.
- Interfaced directly with formerly incarcerated program participants and staff to design program goals and practices in their best interest.

### Medical Scribe, Southeast Health Center
San Francisco, CA – October 2017 - July 2018

- Documented patient histories and exams for primary care providers during and after patient visits.
- Gained proficiency in eClinicalWorks for medical record keeping and review.
- Mentored incoming scribes individually to build up proficient understanding and quality of work.
